

Gyaane Cybersecurity Mini-Course - Promotional Reel Scripts

5 short-form reel scripts | Target duration: 30-40 seconds each

Reel 1: Hackers Don't Need Your Password

Hackers ko tumhara password hack karne ki zarurat hi nahi hai.

Actually, sometimes unhe coding bhi nahi karni padti.

Ek fake bank call. Ek urgent message. Ek link. Aur tum khud apna password ya OTP de dete ho.

Isi ko social engineering kehte hain - system ko nahi, insaan ko manipulate karna.

And that's scary, because the weakest point in cybersecurity is sometimes not the computer. It's us.

Cybersecurity ko aise hi simple examples ke through samajhna hai? Main Adfar Sir lekar aaya hoon aapke liye Gyaane app par complete beginner Cybersecurity mini-course.

10 short videos. Simple language. Practical concepts. Gyaane download karo and start learning.

Reel 2: Why Would Anyone Hack Me?

"Mujhe hacker kyun target karega? Main koi celebrity thodi hoon."

Ye cybersecurity ka probably sabse dangerous assumption hai.

Cybercriminal ko hamesha specifically tumse dushmani nahi hoti. Sometimes they just need an account, an email, a password, payment information, ya tumhari identity.

Aur attacks often scale - thousands of people can receive the same phishing message.

You don't need to be famous to become a target. You just need to be vulnerable.

Aur isi liye main Adfar Sir lekar aaya hoon Gyaane app par beginner Cybersecurity mini-course - jahan hum cybersecurity ko zero se simple language mein samjhenge.

Gyaane app download karo and start learning.

Reel 3: The Most Dangerous Hacker May Never Write Code

Duniya ka sabse dangerous hacker zaroori nahi hai ki coding mein genius ho.

He might just be really good at understanding people.

"Sir, bank se bol raha hoon." "Your account will be blocked." "OTP bata dijiye."

Fear. Urgency. Trust. Ye sab use karke attacker tumse woh kaam karwa sakta hai jo technology se karna difficult hota.

That's social engineering.

Cybersecurity sirf computers ko protect karna nahi hai. It's also about understanding how humans get manipulated.

Main Adfar Sir lekar aaya hoon Gyaane app par complete beginner Cybersecurity mini-course - 10 short videos mein important concepts simple language mein.

Download Gyaane and check it out.

Reel 4: Imagine Waking Up and Everything Is Locked

Imagine subah laptop open kiya...

Photos locked. Documents locked. Projects locked. Everything.

Aur screen par ek message aata hai: paise do, warna files wapas nahi milengi.

Sounds like a movie? This type of attack has a name - ransomware.

Ransom matlab kisi cheez ko hostage rakhkar paise demand karna. Ransomware basically tumhare data ko hostage bana sakta hai.

Cybersecurity ke words complicated lagte hain, but concepts ko sahi example se samjho toh they become much easier.

Isi liye main Adfar Sir lekar aaya hoon Gyaane app par beginner Cybersecurity mini-course.

10 short videos. Download Gyaane and start learning.

Reel 5: You Lock Your House. What About Your Digital Life?

Ghar se bahar jaate waqt door lock karte ho.

Bike lock karte ho.

Phone par screen lock lagate ho.

But what about your digital life?

Same password har jagah. Random links pe click. MFA off. Unknown messages par trust.

We've learned how to protect ourselves in the physical world. But aaj humein apni digital life ko protect karna bhi seekhna padega.

And you don't need to become a hacker to understand cybersecurity basics.

Main Adfar Sir lekar aaya hoon Gyaane app par complete beginner Cybersecurity mini-course - 10 short videos, simple and practical.

Gyaane app download karo and start learning today.
